Platform Assignment

CLS Argos is the unique organization authorized to allocate Argos ID numbers. Each platform being characterized by only one number, users are requested to take care in handling these numbers. It is mandatory to distribute the repetition period allocated to the platform over the range + or - 10% of the proposed value.

IMPORTANT

CLS Argos does not assign specific frequency channels to Argos platforms. For better transmission performances, it is strongly recommended to use the entire "Argos 2" bandwidth from 401.620 MHz to 401.680 MHz while keeping out of "Argos 1" central part of the band (401.646 MHz to 401.654 MHz).

For further information and to know the best transmission strategy (duty cycle, repetition rate and frequency choice) before deploying platforms in a particular geographic area, do not hesitate to contact your useroffice.

Please find the 12 ID number(s) requested :
